
YOUR PARTNER FOR ENERGY-EFFICIENT PLASTICIZING TECHNOLOGY

PRODUCTS AND SERVICES

Iηmex offers energy-efficient plug-and-play plasticizing technology for injection molding machines and extruders, in which the heating elements are integrated into the cylinder. This optimized heat transfer leads to significant energy savings, much faster heating and many other benefits.

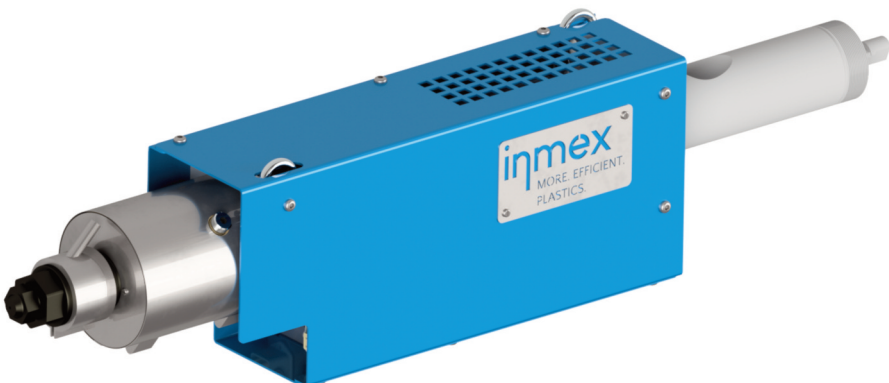
Our efficient plasticizing units can be retrofitted to the machines of all manufacturers and screw diameters < 60 mm. Many models of common machines are in stock and available immediately.

In addition, we offer services like energy efficiency analyses. With reliable measuring technology, we put your machines through their paces. Let’s find your machines‘ savings potential together.

It is worth it!

YOUR BENEFITS AT A GLANCE

- up to 55 % heating energy savings
- retrofittable for any machine
- lower waste heat losses
- faster heating



- longer lifetime
- highly wear resistent
- higher control quality
- protection against pollution

ABOUT US

Iηmex stands for injection molding and extrusion. Above all, iηmex stands for innovative plastic technology and energy efficiency. We rely on quality Made in Germany and are pleased to help you to make your production more efficient. Do not hesitate and start saving energy costs tomorrow. Contact us!

Iηmex was funded by the EU and North Rhine-Westphalia funds and was awarded several times, including the NUK business plan competition.
